SKU:

Categories:Head Models

Product Description

A model that shows the muscles of the head, neck and upper thoracic region. Superficial muscles and deep muscles are also represented, as are the paths of the subclavian and carotid arteries. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBS): 7.7 lbs. Dimensions. (Inches): 17.32 x 12.99 x 20.08
