SKU:

Categories:Head Models

Product Description

Life-size model cut horizontally into 12 parts, giving an idea of how computed tomography and magnetic resonance imaging work. Each part can be rotated and removed for closer and more accurate examination. All structures including muscles, nerves, brain and grooves are numbered and identified on the information card. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 7.7 lbs. Dimensions. (Inches): 10.24 x 7.87 x 9.84
