Categories: Brain Models

Product Description

Life-size brain model with different color coding for regions: frontal lobe; parietal lobe; occipital lobe; temporal lobe; motor cortex; somatosensory cortex; limbic cortex; cerebellum; brain stem. Important anatomical structures are numbered and indicated in different colors for easy understanding. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in

comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education providing opportunities for all students to increase their knowledge of anatomy physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 4.4 lbs. Dimensions. (Inches): 9.84 x 8.66 x 13.78
