SKU:

Categories:Brain Models

Product Description

Model five times life size in five parts and shows the various functional areas of the thalamus in different colors. Detailing differences in the cores of each structure. Important anatomical structures are numbered; Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 8.27 x 6.3 x 11.81
