SKU:

Categories: Ear Models

Product Description

A one-piece model a useful tool for studying the mechanism of sound reception. The model shows an enlarged section of the cochlea and the organ of Corti including the hair cells and the tectorial basilar membrane. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also

provides a platform for continuing education providing opportunities for all students to increase their knowledge of anatomy physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 4.4 lbs. Dimensions. (Inches): 17.32 x 12.99 x 8.66
