Categories: Lung Models

Product Description

Life-size model clearly shows the segmental anatomy of the left and right lung. The various lobes are painted different colors to highlight their locations. Important anatomical structures are numbered; Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of

individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 4.4 lbs. Dimensions. (Inches): 13.78 x 9.45 x 22.05
