Categories:Lung Models

Product Description

A 5-part model segmented longitudinally to reveal in detail the internal structures, including those of the hyoid bone, cartilage, ligaments, muscles, vessels, nerves and the thyroid gland. Important anatomical structures are numbered and indicated in different colors for easy understanding. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 2.2 lbs. Dimensions. (Inches): 8.27 x 6.3 x 11.81
