Simulaids,SMART STAT Trauma Overlay Flash Moulage

Item No.	808-6004
Make:	Nasco Healthcare, USA

Read More

SKU:

Categories:ALS Adult

Product Description

- Cost-effective, advanced trauma overlay
- Ideal for training staff to manage trauma stabilization
- Design of overlay has the added advantage of utilizing the internal bleeding system already present on the SMART STAT
- Rugged moulage system can be further enhanced with the addition of the Xtreme Trauma Bleeding Arm (101-481) and Xtreme Trauma Bleeding Leg (101-482) for maximization of any extreme trauma or mass casualty training program
- Durable and versatile
- Overlay allows for rapid modifications depending on the scenario demonstrated and whether or not the wound is made to bleed

- Simple system allows for easy setup and will not come off during extraction training
- Check change out the existing overlay on your SMART STAT link in the bleeding system and, in seconds, change up your presentation
- Excellent way to build out your advanced ALS level training with medics, paramedics, and other medical professionals interested in taking trauma management beyond the basics by combining the advanced features of SMART STAT with an enhanced, easy-to-use trauma upgrade

Why Choose the Simulaids SMART STAT Trauma Overlay Flash Moulage for Your Simulation Lab in India?

The Simulaids SMART STAT Trauma Overlay Flash Moulage (Item No. 808-6004) by Nasco Healthcare, USA is a cost-effective, durable trauma upgrade designed specifically for use with the SMART STAT ALS simulator. It transforms your existing SMART STAT into a high-realism trauma training platform in seconds — without replacing the manikin or investing in a separate trauma simulator. The overlay is purpose-built for training medical professionals in trauma stabilisation, making it highly relevant for ATLS and trauma care training programmes, emergency medicine departments, military and paramilitary medical training units, and disaster medicine teams across India.

The design of the overlay is intelligent in how it integrates with the SMART STAT: it directly utilises the internal bleeding system already built into the manikin, so bleeding scenarios activate through the simulator's own mechanisms without additional hardware. The overlay allows for rapid scenario modifications — instructors can quickly change wound presentation, and toggle bleeding on or off depending on the training objective. The system is simple to set up, locks securely in place, and will not detach during extraction training — a critical requirement for scenarios involving patient movement. For institutions running extreme trauma or mass casualty training programmes, the overlay can be further enhanced by adding the Xtreme Trauma Bleeding Arm (101-481) and Xtreme Trauma Bleeding Leg (101-482) as companion accessories, expanding the scope of injuries that can be simulated. This modular approach means labs can scale trauma complexity incrementally without replacing equipment.

This overlay is ideal for ALS and ATLS training centres, paramedic and EMT programmes, armed forces medical training units, hospital emergency medicine departments, and disaster response training organisations across India that want to maximise the trauma simulation capability of their existing SMART STAT investment.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Nasco Healthcare and Simulaids products in India with over 30 years of experience supplying medical simulators and accessories to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site demonstration, and dedicated after-sales support. All products carry genuine manufacturer warranty.

Frequently Asked Questions

Q: Which SMART STAT simulator models is this trauma overlay compatible with? A: This overlay is designed for use with the Simulaids SMART STAT ALS simulator (Basic and Complete configurations) by Nasco Healthcare. It utilises the SMART STAT's built-in internal bleeding system.

Q: Can this overlay be used for mass casualty incident (MCI) training? A: Yes. When combined with the optional Xtreme Trauma Bleeding Arm (101-481) and Xtreme Trauma Bleeding Leg (101-482) accessories, the system is well-suited for extreme trauma and mass casualty training programmes.

Q: How do I order and get support from SEM Trainers? A: Contact us at sem@semtrainers.com or call +91-88495 63724. We supply genuine Nasco Healthcare accessories with pan-India delivery.
