SKU:

Categories: Muscle Models

Product Description

Life-size model with femoral portion: gluteus medius, gluteus minor, iliacus, inferior and superior twin muscles, obturator internus, piriformis and psoas muscles and joint capsule ligaments. Made of high quality durable plastic material, the model is articulated and shows the hip muscles in detail, showing the main muscles and ligaments, ideal for offices, clinics, exam rooms, waiting rooms for patient education. The model comes on a stand base and with a double information card. The model can be

removed from the base. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 5.12 x 5.12 x 13.78
