Product Description

A life-size model that represents a functional model of the knee joint with lateral ligaments, meniscus and patellar ligament. Made from long-lasting synthetic material and assembled by hand, it is long-lasting. Mounted on durable polymer base; Comes with an interactive 3D anatomical model with augmented reality and is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 2.2 lbs. Dimensions. (Inches): 5.12 x 5.12 x 13.78
