Categories: Clinical Skills Trainers

Product Description

Adam Rouilly offers a wide selection of Clinical Skills Simulators - Bronchoscopy. Explore our diverse collection tailored for precise medical training needs. Our simulators provide effective tools for bronchoscopy techniques and anatomical study, meeting educational needs. Discover how our range enhances teaching and learning experiences.

Skills

- A multi-functional intubation model produced in cooperation with Prof. Dr. John A. Nakhosteen for

teaching paediatric bronchoscopy and upper airway anatomy

- Manipulating instruments within the confines of paediatric anatomy
- Using rigid bronchoscope and flexible fibre-optic bronchoscope (FBB)
- Laryngoscopic intubation

Features

- Model corresponds to a four to five year old child
- Realistic right-left head movement and retroanteflexion
- Nasal passages suitable for 4.5 mm nasotracheal tube
- Tracheo-bronchial anatomy with tracheal lumen
- Accoustic membranes in the thoracic wall for auscultation
- Integrated tracheo-bronchial system which can accommodate a 5mm rigid bronchoscope
- If during intubation, too much pressure is applied an audio signal is heard
