## Suprapubic Training Model, Light

**Item No.** AR341  
**Weight**  
**Make:** Adam, Rouilly Limited, UK

[Read More](#)

**SKU:**

**Categories:** Clinical Skills Trainers

## Product Description

The Suprapubic Training Model provides a realistic simulation for safe, effective catheterisation practice. Trainees experience abdominal wall resistance, learn correct catheter length, and confirm successful bladder access through fluid return. An essential tool for building confidence and competence in suprapubic catheterisation across nursing, urology, and healthcare training environments.

## Skills

- Suprapubic catheterisation is becoming an increasingly common alternative to urethral indwelling catheters, and can be undertaken by practitioners and nurses in many healthcare settings
- Training away from the patient is essential to ensure that practitioners feel confident and

competent to carry out the procedure.

- The suprapubic catheterisation model allows the practitioner to feel the normal pressures exerted by the abdominal wall on catheterisation
- Allows the practitioner to understand the average length of catheter required to be inserted in order to drain the bladder

## Features

- When the bladder is successfully reached water will flow through the catheter

## 2 Year Guarantee

- This model, manufactured by Adam,Rouilly, comes with a 2 Year Guarantee. This guarantee applies to models which have been used correctly and covers durability and functionality.

## Includes

- Lower torso attached to a vacuum formed base
- Plastic container with lid and fittings
- Pressure bulb with tubing and connectors
- Size 16 Foley Catheter
- Instruction manual
- Rigid carrying case
