Product Description

Why Choose the Adam Rouilly Stoma Care Torso – Light for Your Simulation Lab in India?

The Stoma Care Torso – Light (Item No. AR150) by Adam Rouilly Limited, UK is an updated, larger-

than-previous adult-sized stoma care training torso in light skin tone — featuring five interchangeable, highly realistic stomas for colostomy, ileostomy, and urostomy care training. For oncology nursing programmes, colorectal surgery nursing, stoma therapy specialist training, and NMC-mandated clinical skills labs in India that need a dedicated stoma care trainer covering all three major stoma types on a single realistic torso, this is the most complete stoma care training platform in the catalogue. Backed by a two-year guarantee. Includes instruction manual and carrying case.

The five interchangeable stomas cover the full clinical range of stoma presentations encountered in post-operative nursing and stoma therapy: Ileostomy, Loop Ileostomy, Urostomy (with stents), Colostomy, and Loop Colostomy (with pre-inserted hole for bridge/rod) — the Loop Colostomy configuration being particularly valuable for training the bridge and rod placement technique that is specific to loop colostomy management. Each stoma is interchangeable, enabling a single training session to progress through multiple stoma types. Adam Rouilly's latest materials and production techniques have been used to create the most realistic stomas yet produced on this platform — both in look and feel — giving trainees the tactile training experience needed to develop peristomal skin assessment and appliance fitting skills that transfer to real patients. The torso is compatible with most barrier creams and films, and dressings and plasters can be applied and removed repeatedly without degrading the training surface. The Stoma Care Torso is equally valuable as a tool for patient self-training as for healthcare professional training — stoma patients need to learn their own appliance management, and this torso allows that education to happen in a clinical or home setting without exposing the patient's own stoma during early learning.

Why Buy from SEM Trainers? SEM Trainers & Systems is an authorized distributor of Adam Rouilly products in India with over 30 years of experience supplying medical simulators to 1,500+ institutions across 28 states. We provide pan-India delivery, on-site installation, faculty orientation, and dedicated after-sales support.

Frequently Asked Questions

Q: How many stoma types does this torso include? A: Five interchangeable stomas — Ileostomy, Loop Ileostomy, Urostomy (with stents), Colostomy, and Loop Colostomy (with pre-inserted bridge/rod hole) — covering all three major stoma categories.

Q: Can barrier creams and stoma appliances be applied to this torso? A: Yes. The torso is compatible with most barrier creams and films, and dressings and plasters can be applied and removed repeatedly without surface degradation.

Q: What is the guarantee? A: Two-year guarantee covering durability and functionality under correct use.

The Stoma Care Torso offers realistic training for colostomy, ileostomy, and urostomy care. Featuring five interchangeable stomas with lifelike look and feel, it supports healthcare professionals and patient

self-training. Easy to use, compatible with barrier creams and dressings, it provides practical, hands-on experience in essential stoma management techniques.

Skills

Adam,Rouilly's highly popular Stoma Care Torso has been improved to be larger and closer in size to an adult. Our continuing investment in the latest materials and production techniques has allowed us to create our most realistic stomas – both in look and feel.

- The Stoma Care Torso is designed to train healthcare professionals involved in caring for patients with a colostomy, ileostomy or urostomy
- An invaluable tool also for patient self-training
