Top of the range mini human skeleton. Skillful 3B Scientific engineers using powerful hardware and software optimized the process of reproducing miniatures in order to keep all anatomical details and structures even at half natural size (80 cm).

The skull can be removed and disassembled into three parts (skullcap, base of skull, mandible). The arms and legs are removable. The hip joints are specially mounted so their natural rotation can be demonstrated. The portrayal of the muscle origins (red) and insertions (blue) on the left half. The muscles are numbered. This mini skeleton can be taken off of the base when required.

This mini human skeleton delivers all the anatomical detail you want and need in half the size!
