SKU:

Categories: Human Spine Models

Product Description

New **anatomy app** called 3B Smart Anatomy now included for FREE with BONElike™ Human Vertebral Column Model.

Every original 3B Scientific anatomy model now includes these additional **FREE features**:

- Free access to the **anatomy course** 3B Smart Anatomy, hosted inside the award-winning Complete Anatomy app by 3D4Medical
- The 3B Smart Anatomy course includes **23 digital anatomy lectures**, 117 different virtual anatomy models and 39 anatomy quizzes to test your knowledge
- Bonus: **FREE warranty upgrade from 3 to 5 years** with every product registration

TIP: You will also receive access to a **free 3-day trial to all premium features** of the Complete Anatomy app when you sign up for your 3B Smart Anatomy course.

To unlock these benefits, simply scan the label located on your model and register online. All 3B Smart Anatomy features are **completely free of charge** for you. [Click here](#) to learn more.

This anatomical replica of the human spine is a flexible, mounted, true-to-life model of the human vertebral column in excellent BONElike™ quality. The spine is an original reproduction of all anatomical details, based on real weight. The spinal column model consists of the male pelvis and occipital bone. Occipital bone and atlas can be detached individually from the spine. This vertebral column is delivered without stand, see [A59/8](#).

Here's what 3B customers are saying about 3B BONElike™: "... a unique reproduction of a bone that cannot be distinguished from a real one. One of my staff members, a world-wide renowned bone specialist, was not able to distinguish the vertebra from a real one. I wish your company much success with your excellent artificial preparations." -Prof. Dr. Dr. h.c. Horst Erich König, Director, Institute for Anatomy, University of Veterinary Medicine, Vienna

"... I am convinced that you have developed the best bone ever created by man." -Prof. Vladimire Ovcharov, MD, DSc, Rector Medical University - Sofia

"Thank you very much for sending a vertebral body model. It was a pleasant surprise for me as a keen anatomist. In the first moment, I actually believed it was real bone! My compliments, the material has excellent tactile feel." -Yvonne Kammerer, MD Institute of Anatomy, University of Regensburg, Germany
