To unlock these benefits, simply scan the label located on your model and register online. All 3B Smart Anatomy features are **completely free of charge** for you. [Click here](#) to learn more.

The Knee Joint Model by 3B Scientific® with removable joints is part of a high quality [series of models](#). It has been manufactured to precise anatomical correctness with realistic colors of the joint, bone and muscles. Only extremely durable, nonhazardous material of highest standards has been used throughout the production process.

The model consists of 12 parts which can be easily disassembled for easy demonstration. The muscles and muscle portions can be taken off, and a special color coding has been used to show muscle origin and insertion points on the femur, tibia, and fibula. Additionally, the model also shows parts of the fibular and tibial collateral ligaments.

Whether you are studying or teaching the deeper anatomical layers of the human knee joint, or are looking for a tool to better educate your patients about their injuries and rehab, the Knee Joint Model by 3B Scientific® is an extraordinary teaching tool and offers exceptional value.
