Product Description

This pad that looks and feels like human skin is ideal for diabetic instruction and injection practice. May be worn on the body in specific locations (stomach, thigh, upper arm) to allow patients to inject fluid into the pad to practice giving themselves injections. Pad is thick enough to accept all insulin needles. For safety purposes, the 6-1/4" L x 4-1/4" W x 3/4" D oval pad has a hard plastic backing to prevent the needle from poking through the pad and into the wearer's skin. Has a 1" wide nylon strap with an adjustable plastic buckle.
