- The 3B Smart Anatomy course includes **23 digital anatomy lectures**, 117 different virtual anatomy models and 39 anatomy quizzes to test your knowledge
- Bonus: **FREE warranty upgrade from 3 to 5 years** with every product registration

TIP: You will also receive access to a **free 3-day trial to all premium features** of the Complete Anatomy app when you sign up for your 3B Smart Anatomy course.

To unlock these benefits, simply scan the label located on your model and register online. All 3B Smart Anatomy features are **completely free of charge** for you. [Click here](#) to learn more.

This elderly hip joint model was developed to provide patients understandable information, e.g. before surgery. It shows the right hip joint of an elderly person in half natural size. In addition to the external anatomy of the hip joint, a frontal section through the femoral neck is shown in relief on the base. The hip joint model shows the femoral fractures that occur most commonly in practice as well as typical wear and tear symptoms of the hip joint (coxarthrosis or hip osteoarthritis). The following fractures are

shown on the hip joint:

- Medial femoral neck fracture
- Lateral femoral neck fracture
- Fracture through the trochanteric region (pertrochanteric femoral fracture)
- Fracture below the trochanters (subtrochanteric femoral fracture)
- Femoral shaft fracture
- Femoral head fracture
- Fracture of the greater trochanter
- Fracture or avulsion of the lesser trochanter (avulsion fracture of the lesser trochanter) Femoral fracture and hip osteoarthritis mounted on base.
