SKU:

Categories: Nutrition Education

Product Description

Capture viewers' undivided attention with this clever divided model. One half represents healthy blood glucose and A1C levels by depicting a small number of glucose particles and a red blood cell model that has few glucose particles attached to it. In contrast, the model's other red blood cell contains excess glucose particles and floats through simulated plasma full of glucose particles, representing high A1C and blood glucose levels. Model is 11½" x 2½". Includes informative, bilingual (English/Spanish) tear pad. 100 sheets per pad.
