- The 3B Smart Anatomy course includes **23 digital anatomy lectures**, 117 different virtual anatomy models and 39 anatomy quizzes to test your knowledge
- Bonus: **FREE warranty upgrade from 3 to 5 years** with every product registration

TIP: You will also receive access to a **free 3-day trial to all premium features** of the Complete Anatomy app when you sign up for your 3B Smart Anatomy course.

To unlock these benefits, simply scan the label located on your model and register online. All 3B Smart Anatomy features are **completely free of charge** for you. [Click here](#) to learn more.

This Model of the Female Breast by 3B Scientific® is a truly valuable tool to demonstrate the differences between healthy and unhealthy breast tissue. The set includes a right and a left breast. Both are depicting common diseases like mastitis, fibrocystic breast condition, and malignant tumors.

Use this model to teach your students about breast diseases, to educate your patients, and to raise awareness. The high quality of both the material used as well as the medically correct anatomy of the Female Breast Models make it a true 3B Scientific® product and a great educational tool for you. Both models are held together with magnets for easier demonstration.

Lactating right breast:

- Medially divided into 2 halves
- Healthy lactating breast tissue on the cut surface of the external half
- Breast gland inflammation (mastitis) on the cut surface of the inner half

Non-lactating left breast:

- 2 sagittal cuts, can be separated into 3 parts
- Healthy anatomical structures on the sectional plane of the external half
- Skin on the external half is windowed to view the regional lymph nodes

- Cysts and fibroadenoma on the external sectional plane of the middle breast cut
- Pathological proliferation of the breast connective tissue (fibrocystic breast disease) on the inner sectional plane of the middle breast cut
- Malignant tumors on the sectional plane of the inner breast cut
