SKU:

Categories: Airway Management Adult

Product Description

The AirSim Advanced Model with Bronchial Tree features the uniquely constructed AirSim airway, designed to provide true, anatomically correct and visually accurate internal features. The addition of a "real-feel" skin covering provides a more realistic bag mask ventilation training experience. AirSim Advanced features an improved neck design allowing for accurate articulation. AirSim Advanced also features an anatomically accurate nasal passage, inflatable tongue to increase difficulty of airway and

an option to include "breakout teeth" (see W47404T and W47404TB) to simulate the effects of bad practice in laryngoscopy. **The AirSim Advanced Model is ideal for training in:**

- Effective bag mask ventilation
- Use of full range of superglottic devices
- Video and standard laryngoscopy
- Tracheal and naso-tracheal intubation
- Awake fiberoptic examination

Manufacturer recommends the following equipment sizes for optimal performance:

- 7.0-7.5 mm ID for nasal intubation
- 8.0-9.0 mm ID for oral intubation
- Size 3 and 4 for LMA laryngeal masks (similar respective sizes for other superglottic devices)
Size 35F-37F endobronchial tubes

Product components:

- 1 Carrier case
- 1 USB pen drive user manual
- 1 Bottle of TruCorp® lubrication
- 3 Adult lung bags replicating 2 lungs and stomach

Manikin can be used with Supraglottic airway devices for airway training.
