SKU:

Categories: Airway Management Adult

Product Description

The AirSim Multi contains the key features of the AirSim Standard (W47401) with the addition of a nasal passage and a chin. The AirSim Multi facilitates training on nasal procedures as well as bag and mask ventilation techniques. The nasal passage has been developed in a manner similar to the main airway. This gives the same anatomical realism and functionality, important landmarks such as the turbinates are clearly defined. In addition, the material used offers the same tactile feedback which is

delivered with the main airway itself. There is also an option to include "breakout" teeth to simulate the effects of bad practice in laryngoscopy (see W47402T and W47402TN). These features allow AirSim Multi to be used for training and practice in nasotracheal intubation and nasally directed fiberoptic examination. **The AirSim Multi can be used in the training of all the procedures facilitated by the AirSim Standard (W47401) with the addition of:**

- Naso-tracheal intubation
- Awake fiberoptic examination
- Bag & mask ventilation techniques

Manufacturer recommends the following equipment sizes for optimal performance:

- 7.0-7.5 mm ID for nasal intubation
- 8.0-9.0 mm ID for oral intubation
- Size 3 and 4 for LMA laryngeal masks (similar respective sizes for other supraglottic devices)

Product components:

- 1 Carrier case
- 1 USB pen drive user manual
- 1 Bottle of TruCorp® lubrication
- 3 Adult lung bags replicating 2 lungs and stomach
