Product Description

The Life/form® Airway Management Trainer simulates non-anesthetized patients for practicing intubation, ventilation, and suction techniques. Realistic anatomy and landmarks including teeth, tongue, oral and nasal pharynx, larynx, epiglottis, arytenoids, false cords, true vocal cords, trachea, lungs, esophagus, and stomach. The trainer allows you to practice oral, digital, and nasal intubation, as well as E.T., E.O.A., P.T.L., L.M.A., E.G.T.A., and Combitube® insertion. Suction techniques and proper cuff inflation may also be practiced and evaluated. Features durable, rugged, one-piece construction and bifurcated lungs. “Airway Larry” represents an adult with more room to maneuver than the Adult Trainer (Number available upon request). With its slightly anterior position, “Airway Larry” is a great trainer for introductory as well as advanced students. It is ideal for testing purposes and Combitube® practice. Applying pressure to the cricoid cartilage changes the position of the trachea and closes the esophagus, allowing realistic practice of the Sellick maneuver. The jaw thrust technique can

also be practiced. The trainer can also be attached to Nasco's CPARLENE®, CRiSis™ Manikin. Comes with training stand to mount head, pump spray lubricant, and hand carrying hard case.
