Categories:ALS Adult

Product Description

The IV Arm is available in a version that connects to the right arm socket of the CPARLENE® manikin. Features realistic vinyl skin and latex veins so the skin actually rolls as you palpate the vein, and the characteristic “pop” can be felt as the needle penetrates the vein. Realistic flashback occurs with proper insertion. The arm pivots at the elbow for easy accessibility to antecubital fossa, along the forearm, and at the back of the hand. A bony landmark at the shoulder helps identify muscle tissue for intramuscular injections. Replacement skins and vein sealant are available. The kit includes the Injectable Training Arm with white skin, two fluid supply bags, 3 cc syringe, 12 cc syringe, needle, one pint blood, teaching guide, and carrying case.
