Categories:ALS Adult

Product Description

Perfect for practicing defibrillation of “Airway Larry,” CRiSis™ and CPARLENE® brand torsos or manikins. The chest skin lets you defibrillate using standard manual, automatic, or semi-automatic external monitor defibrillators by attaching directly to your manikin. An internal load box absorbs the full strength of every shock to protect students and equipment. The skin also makes it possible to monitor the manikin from 4 ECG sites, just like a real patient. Can do manual, AED, and quick look defibrillation. Skin attaches easily to either “Airway Larry,” CRiSis™ and CPARLENE® manikins and is compatible with any patient ECG simulator.
