Product Description

STAT Baby Advanced has all the features of a STAT Baby, but utilizes easy-to-use iPad®* technology. It gives the instructor control of the physiological features of the baby to deliver challenging training to develop student assessment skills and easily tracks sessions for later review and debriefing. Key functions include managing student information, easily create alternate scenarios or use those already existing, and efficient records management of the training, all managed through an easy iPad®* interface. It satisfies every training need for post-neonatal care of pediatric patients, from introducing students to basic concepts to challenging medical staff in advance medical procedures. This affordable trainer augments your training budget by utilizing low-cost replacement items in those areas where repetitive, perfect practice, makes perfect skill attainment. **Includes the following standard features of the STAT Baby:**

- 7 pulse points
- I/O leg
- 3 IV sites
- PICC access site
