SKU:

Categories: Injections and Punctures

Product Description

This epidural and spinal injection trainer is very impressive thanks to its **extremely realistic haptic feedback**, and the use of high-quality, hard-wearing materials.

Thanks to close cooperation with epidural anesthesia specialists, incomparably realistic conditions could be recreated.

The light, compact structure can be used in a wide variety of ways. The device has low operating costs

and is intuitive to use, ensuring lasting, high-level performance.

A summary of the device's main functions:

- epidural anesthesia using the loss-of-resistance and the hanging-drop technique
- spinal anesthesia with realistic resistance of the dura and arachnoid mater with or without a cannula
- fluid-filled spinal canal with realistic outflow rate thanks to the ability to adjust the excess pressure
- an epidural catheter can be inserted into the epidural space
- closed water system
- easy to clean

Developed and manufactured in Germany!

The trainer is suitable for both medical training and for specialist medical training.

Delivery contents:

The epidural and spinal injection trainer (P61) includes:

- 1 x base body
- 1 x vertebral bar
- 1 x LOR insert (loss-of-resistance)
- 1 x skin
