Product Description

The Basic Buddy™ CPR Manikin is a dramatic, inexpensive, and state-of-the-art manikin designed for teaching individuals or large groups the life-saving techniques of CPR. This manikin offers a realistic and affordable way to provide each student with their own CPR manikin. The one-piece, disposable lung/mouth protection system makes this manikin completely sanitary - there is no risk of cross contamination and no need to sanitize the manikins after use! The airway opens using the head tilt/chin lift method, and there is a visible chest rise when ventilated. The xiphoid process provides an anatomical reference point for hand placement and compressions. The manikin also features both adult and child capabilities.

Basic Buddy® CPR Manikin 5-Pack manikins are simple to assemble and provide trouble-free maintenance. Rugged carrying bags make transporting the Basic Buddy® CPR Manikin 5-Pack convenient (manikins fit into bags fully assembled). Consists of five adult/child manikins, 50 lung/mouth protection bags, five lung insertion tools, one carrying case, and an instruction manual. Five-year warranty. **NOTE:** When using foam-bodied manikins for AED training use only pads designed for foam body manikins.

Features:
