Categories:BLS Child

Product Description

The AirSim Child Bronchi X, based on a 6 year old, features the AirSim pediatric airway, nasal passage and internal anatomical detail down to the 4th generation bronchi facilitating full airway management and bronchoscopy techniques.

Features include:

- AirSim® Pediatric Airway
- Realistic feedback during bag/mask ventilation, supraglottic airway insertion and both naso- and orotracheal intubation
- Lifelike external and internal anatomical features allow for easy and successful demonstration of all pediatric video laryngoscopes (VL)
- Inflatable tongue bulb to simulate tongue edema
- Missing front teeth resemble natural dentals of a six year old child
- Real feel' skin covering for added realism during airway management procedure training

The AirSim Child X will provide a solution to your training needs in:

- Direct and video laryngoscopy
- Endo and naso tracheal tube insertion
- Supraglottic device insertion
- Bag mask ventilation
- Fibre optic bronchoscopy techniques
- Lung isolation techniques
- Lung suctioning
- Diagnostic bronchoscopy

Product components:

- 1 Carrier case
- 1 USB pen drive user manual
- 1 Bottle of lubrication
- 3 Child lung bags replicating 2 lungs and stomach

Manikin can be used with Supraglottic airway devices for airway training.
