SKU:

Categories: Airway Management Child

Product Description

The AirSim Child Bronchi X, based on a 6 year old, features the AirSim pediatric airway, nasal passage and internal anatomical detail down to the 4th generation bronchi facilitating full airway management

and bronchoscopy techniques.

Features include:

- Realistic feedback during airway management procedures
- AirSim® pediatric airway and nasal passage
- Bronchi accurate down to the fourth generation to facilitate full range of bronchoscopy techniques
- True to life external and internal anatomical features for clear demonstration of video laryngoscopy
- Inflatable tongue simulates edema for advanced practice
- Missing front teeth resemble actual dentals of a six year old child
- ‘Real feel’ skin covering with lifelike texture

The AirSim Child Bronchi X will provide a solution to your training needs in:

- Direct and video laryngoscopy
- Endo and naso tracheal tube insertion
- Supraglottic device insertion
- Bag mask ventilation
- Fibre optic bronchoscopy techniques
- Lung isolation techniques
- Lung suctioning
- Diagnostic bronchoscopy

Product components:

- 1 Carrier case
- 1 USB pen drive user manual
- 1 Bottle of TruCorp® lubrication
- 3 Child lung bags

Manikin can be used with Supraglottic airway devices for airway training.
