This female pelvis skeleton model is especially suitable for studying female genital organs in the context of their anatomical position in the the pelvis. It consists of female pelvis with a movable symphysis, hip bone, sacrum, coccyx, 2 lumbar vertebrae and a female genital insert with rectum. Womb and bladder can be removed for more detailed anatomical study. This model is great for studying and teaching the anatomy of the human female genital organs. The Female pelvis skeleton with genital organs is delivered on base for easy display in the classroom or doctor's office.
