Categories: Injections and Punctures

Product Description

The economical Portable IV Hand Training Hand combines realism, fine detail, and lightweight convenience in a single trainer. This self-contained trainer is packaged in a plastic case that can be converted into a work station. Trainer includes everything you will need to begin training and practicing IV skills. This simulator is constructed of soft material with Life-like veins in the skin surface that are visible and palpable. Veins are accessible through at the back of the hand, making it possible to practice venipuncture at any of the common sites. When puncturing through the vinyl skin and veins, the skin will actually roll as you palpate the veins and the characteristic "pop" can be felt as the needle penetrates the vein. This trainer is the ideal way to teach venipuncture techniques including starting IVs and introducing Over the Needle IV catheters. A realistic flashback will be observed when the needle has been accurately inserted in to the vein. This trainer is inexpensive enough so that each student can have their own hand to practice techniques and skills required in their courses. Under normal use, hundreds of injections may be performed. The skin and veins cannot be changed so eventually the

trainer will need to be replaced. Included with each trainer is two IV bags, packet of blood powder and spoon, plastic fluid supply stand, two pinch clamps, 3 cc syringe, 12cc syringe, 12 gauge needle, a winged infusions set and a plastic clamshell storage case.

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins
