Categories:Injections and Punctures

Product Description

The economical IV Training Arm and Hand combine realism, fine detail, and lightweight convenience in a single trainer. These self-contained trainers are packaged in a plastic case that can be converted into a work station. Trainers include everything you will need to begin training and practicing IV skills. The Life/form® Portable IV Training Arm and Hand Trainers are constructed of soft material with life-like veins in the skin surface that are visible and palpable. Veins are accessible at the antecubital fossa, along the forearm, the back of the hand, and thumb veins, making it possible to practice venipuncture at any of the common sites. When puncturing through the vinyl skin and veins, the skin will actually roll as you palpate the veins and the characteristic “pop” can be felt as the needle penetrates the vein. These trainers are the ideal way to teach venipuncture techniques including starting IVs and introducing Over the Needle IV catheters, and a realistic flashback will be observed when the needle has been accurately inserted into the vein. These trainers are inexpensive enough so that each student can have their own arm and hand to practice technique and skills required in their courses. Under

normal use, hundreds of injections may be performed. The skins and veins cannot be changed and trainers will eventually need to be replaced. Included with each of the trainers are two IV bags, packet of blood powder and spoon, plastic fluid supply stand, two pinch clamps, 3 cc syringe, 12 cc syringe, 12 gauge needle, a winged infusion set, and a plastic clamshell storage case.

	Phlebotomy	IM site	Subcutaneous injection	Intravenous bolus injection	Sterile technique	Infusion technique	Suture, incision and hemodialysis site	Pressure squeeze bulb and clenched fist simulation	Simulation of collapsed veins	Replacement skin and veins
