SKU:SQqubeZeroEX

Categories: Patient Monitor Simulators

Product Description

qubeZERO is a generic version of a patient monitoring device.

qubeSERIES monitoring simulation system for your patient monitor/defibrillators.

Key Features:

- **Full functional ECG-monitor interface**
- **CPR-mode, defibrillation, pacemaker**
- **Checklists and standard procedures for documentation**

- **Seamless integration with qubeAV mobile debriefing system**
- **Browser-based scenario editor, image, and video library**
- **Control of vital parameters by instructor**
- **Auscultation functionality, blood glucometer, thermometer with an assessment app**
- **Metronome 12 lead ecg Change in muilty para inteface (Numerical, wave forms and both)Abg report can be created**

Product components:

- **1 software license for a monitor/device**
- **Hardware (frame, carry case, cables)**
- **Sensors: CPR feedback Not included/must purchase the following separately:**
- **iPad Pro 12.9" (5th Generation 2021, 128GB min)**
- **iPad 10.2" (9th Generation 2021, 64GB min)**
- **iPad 10.2" (7th Generation 2019, 32GB min) Dimensions: 24" x 15.75" x 11.5".**

Sh. wt. 11.57 lbs without Apple hardware.
SKILLQUBE · qubeCONTROL

Your simulation scenario is in your hands. Our qubeCONTROL is a comprehensive control unit for the instructor, allowing real-time adjustments within your scenario. Through integration with qubeCLOUD, pre-designed scenarios can be downloaded and played. If something doesn't go as planned, the trainer can intervene spontaneously. Features • Control your scenario, whether pre-designed or free • Activate/deactivate and modify vital signs • Adjust and change qubeASSESS values • Training logbook with export capability • Synchronization with qubeCLOUD enables synchronization of scenarios, device- and organization-specific settings • CPR and ventilation feedback with the resuscitation dashboard (requires SKILLQUBE feedback sensors) • Create and share individual lab reports • Event documentation • Control of a qubeSERIES ventilation simulator using resistance & compliance or existing medical conditions

SKILLQUBE-qubeASSESS

Our qubeASSESS has been designed to enhance realism during training. It aims to enable participants to obtain relevant values as part of the decisionmaking process independently. qubeASSESS allows for adjustments to be considered during the scenario Features • Auscultation of heart, lung, and abdomen • Blood sugar measurement • Temperature measurement • Accessing checklists • Accessing media center • Perform manual blood pressure measurement • View lab reports • Display intensive care values (including ICP, PAP) • Pager alarm • CO alarm • Evaluate feature

qubeCLOUD

Our qubeCLOUD allows organizations and users to manage their simulation systems, create scenarios, and more. Access to the qubeCLOUD is browser-based. Features • Organization and user management with role and permission system • License and device management • Comprehensive scenario editor • AHA scenarios (Guidelines 2020) available • Make device-specific settings and apply them to all simulators with a single click • Make organization-specific settings and apply them to all simulators with a single click • Access to Education Center • Server located in Germany (GDPR compliant)
