SKU:

Categories: Clinical Skills Trainers

Product Description

The Traction Splint Trainer can be set to correspond to an individual's body weight. This allows the instructor to determine if the student is correctly applying the rule of thumb that states "10% of the body weight traction results in adequate relief for, but no further damage, to the patient." The Traction Splint Trainer can be adjusted for body weights ranging from 100 lbs. to 300 lbs. The electrical, push-button panel makes simplified selection easy. After applying traction, the deformity of the thigh recedes and splint can be applied, including any standard ankle hitch. One year warranty. Ship weight 33 lbs.
