SKU:

Categories:Muscle Models

Product Description

Composed of 32 parts and 140cm high, it includes a 6-part muscular arm and an 8-part muscular leg. Removable parts also include skullcap, brain (cut along the longitudinal slit showing internal structures and blood vessels is removable), halves of both lungs showing the bronchial tree and vascular system, 2-part heart clearly representing atria, ventricles, valves and section of the heart wall, liver with gallbladder, stomach dissected into 2 parts, duodenum with pancreas and spleen, large intestine.

Significant features are numbered and referenced on the accompanying information card.

Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 27.6 lbs.

Dimensions. (Inches): 16.54 x 20.87 x 61.42
