Muscle Figure Model, 1/2 Life-Size, 30 Parts

Item No. MG23421

Weight 12.1 lbs

Make: Nasco Healthcare, USA

[Read More](#)

SKU:

Categories:Muscle Models

Product Description

Half life-size and high quality, it represents a complete replica of human muscular anatomy and organs. The model illustrates in detail the surface of the deepest muscles, tendons, ligaments, vessels and structures of the body. The internal organs are removable for closer examination and for studying the relationships between all structures in the body. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students

to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 12.1 lbs. Dimensions. (Inches): 35.43 x 15.75 x 11.81
