## Micro Anatomy of Muscle Fiber Model, 10,000X Enlarged

**Item No.** MG35050**Weight** 5.5 lbs**Make:** Nasco Healthcare, USA[Read More](#)**SKU:****Categories:**Muscle Models

### Product Description

The model presents a strip of muscle fiber with approximate magnification of 10,000 times, especially the cylindrical and multinucleated cells that make up skeletal muscles and the composition of numerous myofibrils. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 5.5 lbs. Dimensions. (Inches): 9.84 x 8.66 x 15.75
