SKU:

Categories:Muscle Models

Product Description

A life-size model that illustrates in detail the muscles, ligaments and bones of the shoulder. Through the different layers of muscles it is possible to observe the deep muscles and also obtain the location of the bone. The model is made up of a single piece. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 2.2 lbs. Dimensions. (Inches): 9.06 x 4.72 x 3.94
