SKU:

Categories: Circulatory System

Product Description

A life-size model and an important tool for studying the topography of the cerebral ventricles related to the basal ganglia. Important anatomical structures are numbered and indicated in different colors for easy understanding. Comes with an information card. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 10.24 x 7.87 x 9.84
