SKU:

Categories:Brain Models

Product Description

A model enlarged several times its natural size that shows the stratification of the human skull, revealing details of internal structures from the skin to the white matter of the brain. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 5.5 lbs. Dimensions. (Inches): 17.32 x 12.99 x 8.66
