SKU:

Categories: Brain Models

Product Description

A life-size brain model divided into 9 parts showing the temporal and occipital lobes the frontal and parietal lobes the cerebellum the brainstem and the basilar artery. All structures including blood vessels are shown in detail. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and

contrast the structure of individual organs. This initiative also provides a platform for continuing education providing opportunities for all students to increase their knowledge of anatomy physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 9.84 x 8.66 x 13.78
