**Categories:** Eye Models

## Product Description

A model six times life size, the model can be dissected in the horizontal plane to show internal details. Cornea, iris, lens and vitreous body can be removed from the model. Muscle attachments in the sclera and part of the choroid are also shown. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 8.27 x 6.3 x 11.81
