SKU:

Categories: Eye Models

Product Description

Model with 14 parts, 2 1/2 the natural size that shows the anatomy of the human eye. The orbits can be opened into 3 parts to reveal the internal structures: Eyelid with lacrimal gland and duct; Muscles - 4 parts; Eyeball dissected into 2 removable halves; Cornea, Iris, Crystalline and Vitreous Body - 3 parts. Made with long-lasting synthetic material. Mounted on durable polymer base with bracket; Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage

learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 8.27 x 6.3 x 11.81
