SKU:

Categories: Eye Models

Product Description

A model three times larger than its natural size, showing the anatomy of the human eye, which can be divided into 8 parts. Hand-painted and made of resin, it comes on a base that makes it a great item for both academic education or explanations to patients, as well as use as a decorative item. The model presents: 2 halves of the sclera with cornea and muscular ligaments; 2 halves of the choroid with iris and retina; Lenses; Vitreous humor. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 2.2 lbs. Dimensions. (Inches): 4.72 x 4.72 x 7.87
