SKU:

Categories: Microanatomy Models

Product Description

A model that shows the anatomy of the tongue in life size, including the palatine and lingual tonsils, epiglottis and muscles. The model includes a well-detailed 20 times life-size magnification of the tongue tissue to show its histology, taste buds, lingual and mucous glands, crypt and muscles. Made with long-lasting synthetic material. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 16.14 x 10.63 x 8.66
