SKU:

Categories:Lung Models

Product Description

A life-size reproduction of the complete human respiratory system, showing the larynx, lungs and heart. Consisting of 7 parts with the larynx dissected along a sagittal plane, the lungs dissected along a frontal plane and the heart in 2 parts. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 5.5 lbs. Dimensions. (Inches): 17.32 x 12.99 x 8.66
