SKU:

Categories: Skin Models

Product Description

A model enlarged 70 times the natural size and shows the main structures through three layers of the hairy skin: hair follicles, sebaceous and sweat glands, erector muscles, sensitive corpuscles, nerves and blood vessels are defined. Important anatomical structures are numbered and indicated for easy understanding. Made with long-lasting synthetic material. Mounted on durable polymer base with bracket; Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 17.32 x 12.99 x 8.66
