Categories:Genital and Pelvis Models

Product Description

This mid-cut model shows all the important structures of the male pelvis. One half of the genitals is removable for more detailed studies. Accompanying an interactive 3D anatomical model with augmented reality is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing

opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology.
