SKU:

Categories: Genital and Pelvis Models

Product Description

A complete life-size model of a female human pelvis. The model is an original mold of a female pelvis that shows in detail the anatomical structures of the pelvic bones, sacrum, ilium, ischium, pubic symphysis, pubis, acetabulum, obturator foramen and coccyx. Comes with an interactive 3D anatomical model with augmented reality, it is a great tool to encourage learning and support. This platform allows students to engage in comparative analysis of anatomical models as they compare and contrast the structure of individual organs. This initiative also provides a platform for continuing education, providing opportunities for all students to increase their knowledge of anatomy, physiology and pathophysiology. One-Year Warranty Ship Weight (LBs): 3.3 lbs. Dimensions. (Inches): 9.84 x 8.66 x 15.75
